

graspAGENT

Travel Agent Commission Management Platform

Yesterday: Flying in the Fog

Agents have to spend time manually chasing commission data. Accounting has to manually pull and compare reports to calculate agents' commissions. Since agents can't easily see their targets and commissions, they're unsure if they're on track and might feel disappointed if their commissions fall short of expectations.

Today: Clear Path to Revenue & Commissions

Give your agents visibility into their commission and sales goals, so they can create a plan on how to hit their numbers. Equip your Managers with the tools to help your team surpass those numbers.

Your travel agents and managers can use the time they save to provide better service for more clients, which leads to more revenue.

Save Time By Utilizing A Commission Management Platform Built for Travel Agencies

Cut Down On Mundane Tasks

Empower your agents with a self-serve portal to view and monitor their sales activities, targets, and commission statements. With 24/7 access, eliminate wasted time on smashing up spreadsheets or chasing information across multiple reports. Give your Managers a 360 degree view into their team's performance.

Make It Easier for Travel Agents to Find What They Need

Eliminate the need to purchase extra back office licenses. Instead, provide agents with an easier to use interface that improves accuracy and prevents information from being overlooked. Provide vast search capabilities and ability to see all activity, paid and unpaid, also the ability to apply for unclaimed commissions.

Support Independent and In-house Travel Agents

- Empower agents to work remotely, at branches, or in the office - agents can submit bookings through the internet
- Give independent travel agents a better interface without exposing sensitive back office information
- Get insights for your management team in a unified report on in-house and independent agent performance - beneficial for both retail and pure-host agencies
